

Why should you attend China International Energy Storage Expo?

At China International Energy Storage Expo (EESA EXPO), Asia's premier energy storage exhibition, the road ahead is paved with countless opportunities. From connecting with 350,000+ of your peers to doing business with 1500+ exhibitors, it's an exhibition that yields benefits throughout the entire year.

What is China energy storage Alliance?

Learn more about how we can help you, or contact us. Century Technology and Trade Mansion 66 Zhongguancun E Rd, Haidian District, Beijing. The China Energy Storage Alliance is a non-profit industry association dedicated to promoting energy storage technology in China.

Will China's energy storage policy triple our capacity forecast?

China's proposed policy to accelerate energy storage deployments - with a target to take its energy storage capacity to 30 gigawatts (GW) by 2025 - could triple our current capacity forecast. The five-year timeframe could prove challenging from an economic standpoint, but China has good reason to push ahead.

How many electrochemical storage stations are there in 2022?

In 2022, 194 electrochemical storage stations were put into operation, with a total stored energy of 7.9 GWh. These accounted for 60.2% of the total energy stored by stations in operation, a year-on-year increase of 176% (Figure 4).

Is energy storage development accelerating in China?

While energy storage development is accelerating in China and other higher-income countries, the share of investment volume in storage technologies out of all forms of clean energy investments is very small.

What is China doing with solar energy in 2022?

In July 2022, the China Energy Construction Corporation began construction of the first solar thermal storage demonstration project in Xinjiang Uygur Autonomous Region of China, with 10 MW of thermal storage and 90 MW of solar power. In particular, China showcased its climate leadership in the 2022 Winter Olympics in Beijing.

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.
