Rod lockers are often located in the stern of the boat, near the transom, and are sometimes built into the transom itself. Many fishing boats have rod holders built into the gunwales or other areas of the boat, but a rod locker provides a more secure and organized way to store fishing rods when they are not in use.

Rod Control Lock is a device specially designed to control and lock rod-shaped objects, usually used in industrial equipment, vehicles, and furniture. This lock ensures that rod-shaped objects are fixed or released when needed through built-in mechanical or electronic mechanisms, thus providing the necessary security and convenience of operation.

A unique and relatively new option is the Pontoon Rod Storage Box from Boat Outfitters. This freestanding box is made from King Starboard and securely holds four rods in vertical racks, along with two small Plano-style tackle trays. What sets the storage box apart from rod racks is that rods and tackle can actually be locked inside it.
