What is batteries Europe?

Batteries Europe, launched in 2019, is the technology and innovation platform of the European Battery Alliance, run jointly by the Commission and stakeholders in the battery industry.

Why is energy storage important in the EU?

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

Why should EU countries consider the 'consumer-producer' role of energy storage?

It addresses the most important issues contributing to the broader deployment of energy storage. EU countries should consider the double 'consumer-producer' role of storage by applying the EU electricity regulatory framework and by removing barriers, including avoiding double taxation and facilitating smooth permitting procedures.

What is the new batteries regulation?

A new Batteries Regulation entered into force on 17 August 2023 to ensure that batteries are collected, reused and recycled in EU.
