

What does the European Commission say about energy storage?

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a staff working document, providing an outlook of the EU's current regulatory, market, and financing framework for storage and identifies barriers, opportunities and best practices for its development and deployment.

How much energy storage will Europe have in 2023?

Europe has seen its first year when energy storage deployments by power capacity exceeded 10GW in 2023. The eighth annual edition of the European Market Monitor on Energy Storage (EMMES) was published last week by consultancy LCP Delta and the European Association for Storage of Energy (EASE).

Does Europe have a battery storage market?

Europe's annual battery storage deployments doubled in 2023, but the pace of adoption is still much slower than required, according to SolarPower Europe. The continental trade association for solar PV industries published new analysis of the sector in its report, European Market Outlook for Battery Storage 2024-2028.

Why is energy storage important in the EU?

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

Is energy storage the key to decarbonising the EU energy system?

The Commission has published today a series of recommendations on energy storage, with concrete actions that EU countries can take to ensure its greater deployment. Analysis has shown that storage is key to decarbonising the EU energy system.

How much energy storage capacity does the EU need?

These studies point to more than 200 GW and 600 GW of energy storage capacity by 2030 and 2050 respectively (from roughly 60 GW in 2022, mainly in the form of pumped hydro storage). The EU needs a strong, sustainable, and resilient industrial value chain for energy-storage technologies.

ees runs in parallel with Intersolar next week in the Smarter E conference and expo series" European edition. Image: Solar Promotion GmbH. An estimated 80,000 professionals from the solar PV, energy storage and electric mobility sectors converge in Munich, Germany, for the Smarter E Expo and conference each year, including ees Europe.

The European Union's transition to a renewable-energy-powered electricity grid will fail unless it does more

to support and promote energy storage, according to the Energy Storage Coalition. EU approves EUR180 million support ...

With the latest policy push, the European storage market is poised for an accelerated take off. According to previous forecasts by Wood Mackenzie, Europe's grid-scale energy storage capacity is expected to expand 20-fold by 2031 to reach 45 GW/89 GWh.

On 14 December 2023, the Council and Parliament reached a provisional agreement to reform the EU's Electricity Market Design (EMD), with the goal of reducing dependence on volatile ...

Europe's industries are diverse, and so are its energy needs. But the common thread binding them is the need for sustainable, reliable, and cost-effective secure energy solutions, Julia Souder writes.

The European Association for Storage of Energy (EASE), established in 2011, is the leading member-supported association representing organisations active across the entire energy storage value chain.

Energy-Storage.news" publisher Solar Media will host the eighth annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, ...

The Commission and Parliament have ramped up their energy policy announcements in the past week. Image: European Union 2017 - European Parliament. Recent policy announcements from the European Union could boost the energy storage market, an analyst says, but also reveal inherent weaknesses of the bloc's free electricity market.

The dispatchable fossil generation we use today to balance the energy system is inconsistent with Europe's climate, energy independence, and security of supply ambitions. What is urgently needed now is the massive and rapid roll-out of critical enabling technologies in the energy sector, notably energy storage solutions.

Energy storage systems were historically used for grid balancing purposes within Europe, limiting their use to such applications or to be considered as "auxiliaries" to renewable generation assets. However, as market prices evolve and new revenue streams emerge, stakeholders must discover the diverse applications energy storage can tap into, ...

Energy-Storage.news" publisher Solar Media will host the 8th annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

As Energy-Storage.news reported back earlier this year, the report was adopted by the European Parliament with an overwhelming majority, ... Ville Niinistö; MEP said that now is a "key period for energy policy

in Europe," and that energy storage is a big part of making the transition to renewables as economically and sustainably as possible ...

REPower EU, the policy strategy which largely targets the end of dependence on Russia for fuels and has been in the making since March following Russia's invasion of Ukraine, was published in its draft form yesterday by the Union. In contrast to a leaked version of the draft which Energy-Storage.news was able to see last week, the proposal does include ...

News 6 Nov 2024 News Energy Storage Coalition welcomes Dan Jørgensen's commitment to renewable energy and calls for urgent EU Action Plan on energy storage read more Publications Policy Priorities 2024-2029 10 Apr 2024 #energy storage, #renewables

As the world was starting to recover from the COVID-19 emergency, in early 2022 another crisis struck: with the Russian invasion of Ukraine starting in late February, almost the entirety of the European Commission activities for 2022 shifted away from the foreseen Working Programme to focus on sanctions and new measures to ensure security of supply. ...

The European market for residential storage looks particularly strong, due to incentives and high grid electricity prices, while the European Green Deal Industrial Plan will support BESS developers as the policy package seeks to support the European economy's transition to sustainable and low-carbon industry.

Energy storage research and innovation activities, policy, funding, news and events. Energy storage research and innovation activities, policy, funding, news and events ... Calls for proposal on energy related themes in Horizon Europe and information on the work programme. European structural and investment funds (ESIF)

Stephan also commented recently on the leaked draft Electricity Market Design reforms, as well as the energy storage recommendations yesterday, calling the former the "strongest legislative language" in support of energy storage from the EC to date and the latter a de facto "energy storage strategy" for Europe. Stephan told Energy ...

However, realistic assessments of the need across Europe are lacking, as are supportive policies and market environments that would enable the deployment of around 200GW of battery storage, which SolarPower Europe estimated would be needed by 2030 in the European Union (EU) Member States alone to meet their agreed renewable energy goals.

The European Commission, the executive arm of the European Union (EU), in 2023 issued recommendations on how member states should proceed with deployments of energy storage. The group said EU ...

During this year's Hungarian Battery Day in Budapest, we sat down with Jacopo Tosoni, Head of Policy at the European Association for Storage of Energy (EASE) to talk about Europe's emerging energy storage industry, recent legislative changes and planned projects in the EU level and Central and Eastern Europe (CEE).. We

began our discussions by reflecting ...

European policy makers need to strengthen the role of flexibility technologies, write Fluence's Julian Jansen and Lars Stephan. ... Energy-Storage.news" publisher Solar Media will host the 8th annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading ...

By Emad Zand, president of Northvolt Systems. This is an extract of an article which appeared in Vol.30 of PV Tech Power, Solar Media's quarterly technical journal for the downstream solar industry. Every edition includes "Storage & Smart Power," a dedicated section contributed by the team at Energy-Storage.news.

As reported by Energy-Storage.news however, and perhaps due in part to input from the industry and advocates, in both cases, later versions of the plans were revised to feature explicit treatment of energy storage. Energy storage does however have friends or allies in the EU government: case in point being a 2020 report spearheaded by Austrian ...

In its latest effort to support the deployment of energy storage in Europe, the European Commission adopted its "Recommendation on Energy Storage - Underpinning a decarbonised and secure EU energy system," on March 14, 2023. It addresses the most pressing issues to help accelerate the broad deployment of energy storage by the EU member states.

That appears to have changed, with 10GW of storage deployed in European countries during 2023, according to the eighth edition of the European Market Monitor on Energy Storage (EMMES), published on Thursday (28 March) by the trade association EASE and analysis and research group LCP Delta.

While the UK is a standout leader of the continent in terms of deployment figures, and arguably also sophistication of business models - as pointed out in a new study by Aurora Energy Research - tracking the European market is also becoming much more interesting, Darmani said. "There was maybe not as much to speak about a couple of years ago on the ...
