

How to get discounts on energy storage products

Are there state-level incentives for solar energy storage?

To date, state-level performance incentives for storage have typically been added to solar incentives. Perhaps the best-known state-level storage incentive in the US is California's Self-Generation Incentive Program (SGIP). SGIP provides a dollar per kilowatt (\$/kW) rebate for the energy storage installed.

What is the energy storage rebate program?

The program was started in 2018, as a response to the need for energy storage systems in fire-prone areas where utility companies frequently shut off power. The program currently offers rebates of between \$150 and \$1,000 per kilowatt-hour of storage.

What is the best incentive for solar storage?

The best incentive for storage is the federal investment tax credit (ITC). The exact same ITC that provides a 30 percent credit on the cost of your solar system provides that same benefit to storage systems under certain conditions.

Are there incentives for home solar batteries?

As a result, there are now several incentives available for home solar batteries, including federal and state tax credits, rebates, and utility programs. Some of them come with certain requirements, like reserving battery capacity for the utilities to use, and then there are others that offer an incentive for simply purchasing a battery.

Does Eversource offer a battery storage incentive program?

Eversource and National Grid serve customers across New England, and offer this battery storage incentive program in Connecticut, Massachusetts, New Hampshire, and Rhode Island. Home solar battery owners can earn annual incentive payments for offering some battery capacity to their utility company for up to 60 days a year during peak summer hours.

How much does a kilowatt-hour storage rebate cost?

The program currently offers rebates of between \$150 and \$1,000 per kilowatt-hour of storage. The differing amounts depend on qualifying factors, with higher rebates going to low-income customers who live in highly fire-prone areas. These homeowners qualify for an "equity resiliency" rebate bonus.
