With the engine running, a portable car heater can run indefinitely because it is powered by the alternator. With the engine switched off, we would not recommend running your portable car heater on your car battery's power for longer than 15 minutes before starting the engine. Are portable car heaters safe?

Most portable car heaters are powered by the car's electrical system, and when they are running, they draw power from the car's battery. If you use a portable car heater while the engine is off or if you have a weak or old battery, it can drain the battery relatively quickly.

The unit comes with both a car charger and a DC wall charger (which has a grounded, three-prong plug to ensure a safe, stable connection), as well as a neoprene case to store your charging...
