

The policy goal of the energy sector in Sierra Leone is to ensure energy security for sustainable development by providing an enabling environment for the effective and efficient management of the country's indigenous energy resources. Issues of primary concern in Sierra Leone's energy sector include:

The UN Sustainable Development Goal 7 on Sustainable Energy is about saving lives and improving energy access. If Sierra Leone must attain this goal by 2030, it would require her to have in the first place a Sustainable Energy for all Policy Agenda and an Action Plan which will help create the enabling environment for huge investments into renewable energy like solar, ...
