

Does Timor-Leste have access to energy?

Access to energy remains a concerning challenge for many in Timor-Leste. The centralised nature of the local electricity supply chain has traditionally kept consumers reliant on the national grid to overcome chronic energy shortages.

Is a solar-powered Grid a good idea in Timor-Leste?

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give maximum dividends. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

Does Timor-Leste have a food security problem?

A key focus for the new nation has been to improve energy access via the rapid roll-out of an electricity network. However, Timor-Leste has seen little improvement in its (predominantly subsistence) agricultural sector, and its food security situation remains precarious.

Does improved electricity access improve development outcomes in Timor-Leste?

This index has fallen since 2010 as petroleum production declined [48]. Overall, Timor-Leste's HDI has shown little improvement since 2010, while electricity access doubled to 100%. The effects of improved electricity access on development outcomes appear less than observed internationally.

Does predp paved the way for future energy access in Timor-Leste?

Conclusions Although PREDP was a pilot programme, it has paved the way for future energy access activities in Timor-Leste. It was the first rural energy programme in Timor-Leste to include a capacity development component, and to have the GoTL and local communities as major partners.

Do Rural Households use electricity in Timor-Leste?

Stakeholder responses and anecdotal observations of rural households in Timor-Leste revealed that lighting, mobile phone charging, television, and radio dominate electricity use with limited adoption in agriculture-related activities. According to respondents, some farming groups operated small diesel generators for rice milling.

The agreements give effect to the historic maritime treaty struck between Australia and Timor-Leste in March last year. Santos managing director and CEO Kevin Gallagher said: "We are delighted to have been part of this historic achievement which marks the next chapter in Timor-Leste's economic independence and development."

ADELAIDE, Australia -- Santos and its partners have signed a memorandum of understanding (MoU) with Timor-Leste's national oil company TIMOR GAP to explore joint opportunities for the proposed Bayu-Undan carbon capture and storage (CCS) project in the Timor Sea.. The MoU follows four non-binding MoUs for the supply of emitted CO<sub>2</sub> to the ...

TGS, in collaboration with the ANPM, has started a 2D cubed seismic data project covering offshore Timor-Leste, in support of the country's ongoing license round. The project combines all available open file and TGS multi-client data across an area of over 50,000 square kilometres and incorporating over 2,500 lines and existing 3D's within the planned ...

A key focus for the new nation has been to improve energy access via the rapid roll-out of an electricity network. However, Timor-Leste has seen little improvement in its ...

operators involved in the energy sector in Timor-Leste. The purpose of this report is to assist the government of Timor-Leste, in particular the office of the Secretary of State for Energy Policy, to develop policies in key areas that would guide planning of the subsequent phase of its ongoing rural energy programs. The selected key areas in

According to the Australian energy giant, the Bayu-Undan joint venture (BUJV) has agreed on terms of a sale and purchase deed (SPD) with TIMOR GAP to transfer a 16% interest in the Bayu-Undan upstream project to Timor-Leste's energy player, with an economic date of July 1, 2024. While the execution of the SPD for this transaction is planned to occur in ...

Santos has signed a memorandum of understanding (MOU) with Timor-Leste regulator Autoridade Nacional do Petr&#243;leo e Minerais (ANPM) to advance a carbon capture and storage (CCS) project at the Bayu-Undan field in the Timor Sea. The Australian energy company is the operator of the Bayu-Undan joint venture (JV) with a 43.4% stake.

Carbon Capture, Utilization, and Storage (CCUS) has emerged as one of the key technologies set to reduce carbon emissions, proving especially useful in projects where eliminating all process emissions is not possible. As a result, Oil & Gas companies are investing in CCUS projects as part of ongoing strategies to reduce their emission footprint and boost ...

Timor-Leste's HDI was 0.607 in 2021, ranking it 140 of 191 countries and territories and below the average of 0.749 for countries in East Asia and the Pacific [47]. As shown in Fig. 3, Timor-Leste's health (life expectancy) index has steadily improved since 2001, and the education index has largely plateaued. The income index, based on Gross ...

the expertise of both nations, the program seeks to address key challenges facing the energy sector by producing a series of research ...

Following the announcement of 2 September 2024, the Bayu-Undan Joint Venture (BUJV) participants and TIMOR GAP have now executed a Sale and Purchase Deed (SPD) to transfer a 16 per cent interest in the Bayu-Undan upstream project to TIMOR GAP, with an economic date of 1 July 2024. Completion of the SPD is subject to customary closing ...

**Conclusion.** In conclusion, the Greater Sunrise project is a transformative initiative set to drive economic growth, boost regional Energy security, and position Timor-Leste as a pivotal player in the Southeast Asian Oil and Gas industry. For professionals and stakeholders in the industry, this project represents a unique opportunity to be part of a landmark development that blends ...

Timor-Leste's National Strategic Development Plan 2011-2030 targets that everyone in Timor-Leste will have access to reliable electricity 24 hours a day by 2030. To achieve this ...

Bea is preparing to host a state-of-the-art liquefied natural gas (LNG) plant. By focusing on LNG, Timor-Leste aims to not just participate in the global energy market but to make a significant impact. The plant will enable Timor-Leste to tap into the lucrative LNG market, turning its natural gas resources into a major export.

In case the Greater Sunrise fields are developed using a pipeline to an LNG processing plant in Timor-Leste, Australia will get 30 per cent, with 70 per cent to Timor-Leste. In case the fields are developed by means of a pipeline to an LNG processing plant in Australia, the ration for Australia will be of 20 per cent, and 80 per cent to Timor ...

Earlier this year, Santos started production from the Phase 3C infill drilling program at the Bayu-Undan field, reporting a better than anticipated outcome from the first well. The first well was brought online at 178 million standard cubic feet per day (mmscfd) of gas and 11,350 barrels per day (bbl/d) of liquids, significantly increasing liquids production to over ...

The Bayu-Undan CCS project is expected to store up to 10 million tonnes of carbon dioxide per annum. This is equivalent to about 1.5 percent of Australia's annual carbon emissions. The project has the potential to be one of the largest CCS projects in the world and one of the many that will be critical to transitioning to a low-carbon future.

Cost: USD 523,350. Project brief: PREDP piloted three types of renewable energy devices in rural areas of Timor-Leste, focusing on isolated villages. It aimed to understand the constraints and ...
